GREETINGS FROM THE PRIME MINISTER

I am pleased to extend my warmest greetings to everyone attending the 2022 edition of Canada's Farm Show.

This event, now in its 44th year, brings together agricultural manufacturers, dealers, suppliers and producers from around the world to network, share ideas and innovations, and look to the future. With a varied program that includes keynote presentations and panel discussions, as well as a broad range of exhibitions showcasing the industry's latest equipment, technology, products and services, delegates are sure to come away inspired to take on new

opportunities.

I would like to commend the organizers and volunteers for their hard work and dedication. Your efforts ensure that Canada's Farm Show is a success, year after year. I would also like to thank the residents of Regina for their warm hospitality.

On behalf of the Government of Canada, I offer my best wishes for an enjoyable and rewarding experience.

Sincerely,

The Rt. Hon. Justin P. J. Trudeau, P.C., M.P.
Prime Minister of Canada

GREETINGS FROM THE PREMIER

On behalf of the Government of Saskatchewan, I am pleased to welcome you to Canada's Farm Show. After a couple of challenging years, it is great to see the agriculture industry gather in person again for this year's event.

As one of the largest trade-shows in our nation, this world class event brings together thousands of producers, exhibitors, and international buyers from around the globe to see the latest and greatest in agriculture technology and equipment. This show provides a great opportunity to attract investment into our province, which in turn strengthens our economy and creates jobs.

Now in its 44th year, Canada's Farm Show is as important as ever. With an ever-increasing global demand for food, farmers need access to industry-leading technologies—and Canada's Farm Show provides exactly that.

Agriculture continues to be one of the leading sectors in our province's growing economy. In 2021,

Saskatchewan agriculture exports were the largest on record, valued at \$17.5 billion. With exciting innovations and technologies coming from our province, Saskatchewan has positioned itself as a key supplier of safe and healthy food for the rest of the world.

In Saskatchewan's Growth Plan for 2030, our government has laid out ambitious, but achievable targets in the areas of crop production, value-added processing and agri-food exports. Saskatchewan does this in a way that is sustainable, ensuring our future generations also have the opportunity to grow and thrive in the agricultural sector. Canada's Farm Show is an important hub for helping us reach those targets.

Thank you to the many organizers and volunteers who contribute to make this world-class event possible.

Welcome and best wishes for another productive and successful show.

Scott Moe
Premier

MESSAGE FROM THE MAYOR

On behalf of my City Council Colleagues and the City of Regina, I am pleased to welcome you to the 44th Annual Canada's Farm Show.

Regina is located in the heart-land of agriculture, and it is with great honour and pride that we can host Canada's largest farm technology and equipment show.

For over 40 years, Canada's Farm Show has connected producers, manufacturers, and buyers from more than 50 countries with over 30,000 attendees each year.

After some time apart, we are thrilled to meet back in person to connect, collaborate and advance the agriculture industry forward. There is an amazing lineup of keynote speakers, panelists, and educational presentations that are sure to inspire and educate all.

Canada's Farm Show takes a lot of planning and passion. I applaud and thank the organizing committee,

volunteers, and those who have invested their time and effort into hosting one of Canada's top agriculture shows.

For those who have travelled to Regina, I want to encourage you to explore some of our wonderful attractions. Enjoy the views of Wascana Park, visit the home of the RCMP Academy and Heritage Centre, or take a walk through our booming craft brewing scene located in our historic Warehouse District. With many unique shops and excellent restaurants, you are sure to discover the warm and friendly spirit Regina is known for.

I wish everyone a great Canada's Farm Show!

Sincerely,

Sandra Masters
Mayor of Regina

MESSAGE FROM REAL

Welcome to the 44th edition of Canada's Farm Show. We are so excited to be back in person welcoming exhibitors and guests from around the world through our doors.

The last two and a half years have been harder than we could ever have imagined. We were forced to think and act differently.

We found ways to connect and do business through video chats and e-commerce. Canada's Farm Show went virtual last year with a very successful two full days of informative programming. People from over 50 countries participated, viewing the videos 92,000 times.

The pandemic is far from over but the time for face-to-face interaction and commerce is back. Our team has been working incredibly hard to plan this year's show to meet the needs of exhibitors and visitors. We have created the biggest stage for the very best in AG. Every day of the show is themed to highlight innovation on day one, education on day two and collaboration on day three. From engaging speakers like Chief Cadmus

Delorme from the Cowessess First Nation, to panel discussions with industry experts, and the debut of new technology, there is truly something for everyone.

There is so much to take in for the first in-person Canada's Farm Show in two years. From speakers to product debuts, the Launch Pad Stage is ready to take off. Take the time to explore and engage with an impressive lineup of exhibitors. We can all use a boost and the latest in new and emerging equipment and technology will help us do that in the Innovation Pavilion. There's the Agri-Value Pavilion, the return of the Empowering Womens Conference and the addition of the Young's Equipment Farmhouse Lounge. Three days almost doesn't seem like enough time, but this is going to be a show to remember.

When not at the show take the time to enjoy the city's many attractions, restaurants, and shopping.

To our valued sponsors thank you for believing in this show and supporting Canadian agriculture.

Enjoy Canada's Farm Show and welcome to Regina.

Tim Reid
President & CEO of REAL

MESSAGE FROM VITERRA NORTH AMERICA

On behalf of the entire team at Viterra, welcome to Canada's Farm Show. This is our fifteenth consecutive year as presenting sponsor, and we are excited to once again be a part of this important forum for innovation, collaboration, and education.

For over 40 years, Canada's Farm Show has been a showcase for the best products, services, and innovations in agriculture. It's provided an outstanding opportunity for like-minded people from here at home and over 50 countries to engage in meaningful dialogue about our industry – an industry that I firmly believe is the most important and dynamic one in the world.

Canada's Farm Show and Viterra are well aligned in this regard. We both recognize the importance of sharing knowledge and exchanging ideas. Our mutual interest is in improving the business of agriculture and this is an excellent way for people to come together and do that.

Just like our industry continues to innovate and

evolve, so too does Canada's Farm Show. While circumstances have prevented us from hosting an in-person show over the last couple of years, it also provided us with an opportunity to step back and come up with new ways to ensure the show remains engaging and meaningful for all participants. There have been many people working hard behind the scenes to accomplish this, and I thank you for your efforts.

It is this same resiliency that drives our farmers to be the best at the world at what they do – growing high quality crops in a sustainable manner to help feed the world. It is their hard work, creativity, and ability to innovate that is moving our industry forward and will support Canada's reputation as a safe and reliable supplier of food ingredients today and well into the future.

I would like to thank the dedicated group of organizers whose efforts continue to make one of Canada's largest tradeshows a great success. To all of this year's attendees, I hope you enjoy everything the 2022 edition of Canada's Farm Show has to offer.

Kyle Jeworski, CEO Viterra North America

Celebrating 15 years as presenting sponsor of Canada's Farm Show

INNOVATION DAY & NATIONAL INDIGENOUS PEOPLES DAY

Tuesday, June 21 • Presented by Protein Industries Canada

TIME	PRESENTER / SPEAKER	TOPIC	DESCRIPTION
9:45 a.m.	Cherilyn Jolly-Nagel - Farmer, Speaker, Advocate and Host of Canada's Farm Show Launch Pad	Welcome and Greetings	
10:00 a.m.	Chief Cadmus Delorme, Cowessess First Nation	Roles Indigenous people play moving forward in Agriculture	Chief Delorme will share about the importance of Truth and Reconciliation, the role Agriculture can play with stronger inclusion of Indigenous People and options moving forward to assure the province and Canada get it right this time.
11:00 a.m.	Kevin Stewart - Olympic Producer, Farmer, Entrepreneur, Disruptive Thought Leader	AG TALK: Fake News, Real Problems 1.0 - How the 24/7 News Cycle Impacts Your Mental Health	The recent pandemic is the first global event to be accompanied by an infodemic - a toxic mixture of facts, fear, anger and speculation all amplified by emerging communication technology. This trend not only creates political and economic upheaval but, most of all, threatens your mental health.
11:30 a.m.	Mark Cooper - President & CEO, Prairie Clean Energy	PRODUCT LAUNCH: Prairie Clean Energy - Biomass fuel pellets made from flax straw and un-utilized ag residue	
12:00 p.m.		Launch Networking	
1:00 p.m.	1) Parag Garg - Chief Digital Officer, CNH Industrial 2) Bob Mazer - President and CEO, Mazergroup Moderator: Cherilyn Jolly-Nagel	Investments in Precision Tech	Parag Garg of CNH, and Bob Mazer of Mazergroup, sit down to discuss the importance of precision technology and the significant investments CNH is making in tools and outcomes that meet their customers' needs. Learn how the addition of Raven into the CNH fold allows them to provide even more efficiency to farm organizations. Hear firsthand how CNH is investing and taking quantum leaps forward in advancing their autonomy team right here in Saskatchewan.
1:30 p.m.	Chris Morson - Sales Specialist, Raven	Driving the Future of Ag	You may have already considered autonomous solutions or may already be using some. Raven will help you continue to learn about and implement autonomous features that do more to reduce fatigue, improve safety, and allocate resources in a way that eases your operations. Raven's approach to Driverless Ag Technology delivers easy-to-implement autonomous farm solutions, OMNiDRIVE™ and OMNiPOWER™, that help the farmer maximize time, safety, and efficiency as the equipment does more of the heavy lifting. Now, the farmer can do more, get more, and give more with every minute of their day.
2:00 p.m.	Vikram Vij - Chef	Modern Indian food boasts of Canadian ingredients and French techniques	Vikram Vij, one of Canada's great chefs, shares his story of the trials and triumphs in building a world-renowned food empire! Fragrant with the smells of cumin, turmeric, fennel, and cloves, Vij reveals the story of Vikram Vij, one of Canada's most celebrated chefs and entrepreneurs. Co-owner of the world-famous Vij's Restaurant in Vancouver, his story is a true rags-to-riches tale of a college dropout from northern India who made it to Europe's temples of high cuisine, then with a one-way ticket bound for Canada, found fame serving some of the world's most transcendent Indian cuisine. Vij's Restaurant, originally a fourteen-seat establishment known for its extraordinary flavours and spice blends, along with a firm no-reservation policy, received accolades from restaurant critics and patrons alike. A culinary journey that began in India as a boy enjoying the praise of visitors for his chai and biscuits, Vikram's passion for Indian cooking and his lifelong mission to bring awareness to the culture he left behind have fueled his tireless drive in building a world-renowned food empire. Driven to succeed, Vikram realized his dream to launch five major initiatives under the Vij's brand by age fifty, but with challenges and sacrifices along the way.
2:45 p.m. - 5:00 p.m.	Cultivator, powered by Conexus	24 Hour Start Up Agtech - Pitch FINALE	The event brings together the best and brightest in agriculture, technology, and business to pitch ideas, form teams, and build a minimum viable product (MVP) in just 24 hours! Join us as we watch the 24 Hour Startup Agtech teams pitch their MVPs to a panel of guest judges for a chance to win up to \$7,000.

EDUCATION DAY

Wednesday, June 22 • Presented by Degelman Industries

TIME	PRESENTER / SPEAKER	TOPIC	DESCRIPTION
9:45 a.m.	Cherilyn Jolly-Nagel - Farmer, Speaker, Advocate and Host of Canada's Farm Show Launch Pad	Welcome and Greetings	
10:00 a.m.	1) Bryan Prystupa - Senior Product Owner, FCC AgExpert 2) Ken Jackson - CEO, VeriGrain 3) Jesse Hirsch - Futurist & Digital Strategist Moderator: Cherilyn Jolly-Nagel	PANEL: Farm Digitization in Canada	The high potential of digital applications for agriculture generates enthusiasm about the future of food production. Some view the intelligence offered by digital tools as a way to solve problems. These experts talk about their perspectives on digitization in a practical ways to explore tech opportunities associated with digitalization.
11:00 a.m.	Kevin Stewart - Olympic Producer, Farmer, Entrepreneur, Disruptive Thought Leader	AG TALK: Fake News, Real Problems 2.0 - Identifying Biased Information to Make Better Decisions	The growth of technology with the ability to manipulate information, has grown far faster than our ability to detect and manage it. This rapid shift from the information age to the age of disinformation, creates havoc with your ability to make smart business decisions. In this session you will learn to identify and avoid fake news information.
11:30 a.m.	1) Derek Molnar - Territory Manager Marketing Manager, Degelman Industries 2) Jordan Heimlick - Junior Design Engineer, Degelman Industries	PRODUCT LAUNCH: Degelman Industries - Pro-Cast Precision Granular Applicator	
12:00 p.m.		Launch Networking	
1:00 p.m.	1) Bo Hallborg - Merchandising, Viterra Oilseed Processing 2) Mehmet Tulbek - President, Saskatchewan Food Industry and Development Centre 3) Dr. Bishnu Acharya (PhD) - University of Saskatchewan Moderator: Cherilyn Jolly-Nagel	PANEL: Enhancing the exploration of the canola chain	The soaring demand for Canadian canola oil used in food and fuel applications has resulted in an increase to process more canola in Saskatchewan. In this panel, speakers dig into the growing canola crushing industry. Discussing processing perspectives from producer to plate. Accomplishments in canola production, crushing industry, food, feed and industrial utilization of canola oil and meal products.
2:00 p.m.	North America's Top Investors Moderator: Kyle Scott - Managing Director - Conexus Venture Capital & Emmertech	PANEL: The Landscape Investment of Agtech	Hear from a panel of North America's top investors as they discuss what makes agtech a fundamentally different asset class, and why they are so bullish in the industry. Kyle Scott, of Conexus Venture Capital and Emmertech, is moderating the session and will be joined by some of the most active investors in the industry, such as: Fall Line Capital, AgCapital Canada, and more.
2:45 p.m. - 5:00 p.m.	Agtech Accelerator Greetings: Honourable David Marit, Minister of Agriculture	DEMO DAY	Cultivator, Emmertech and Economic Development Regina have partnered together to accelerate the growth of agtech through an Agtech Accelerator program. The inaugural cohort (11 companies from Canada and 5 companies from the United Kingdom) will pitch their innovations in hopes of securing a deal with investors in the audience.

COLLABORATION DAY/ YOUNG FARMER'S DAY

Thursday, June 23 • Presented by Farm Credit Canada

TIME	PRESENTER / SPEAKER	TOPIC	DESCRIPTION
9:45 a.m.	Cherilyn Jolly-Nagel - Farmer, Speaker, Advocate and Host of Canada's Farm Show Launch Pad	Welcome and Greetings	
10:00 a.m.	1) David Przednowek - Assistant Vice President Grain, CN Rail 2) Kenric Exner - General Manager of Multimodal Logistics and Trade Execution, Viterra 3) Susan Ewart - Executive Director, Saskatchewan Trucking Association Moderator: Cherilyn Jolly-Nagel	PANEL: The importance of Transportation in Agriculture	Agriculture is a major user of the transportation system, relying on multiple modes of freight through trucking, rail and marine. Transportation in Canada is increasing; Agriculture needs workable solutions. Transport allows farmers to invest more, increase production and reach the international ranges to deliver quality products. Correct logistics is the key to managing the assets or goods from the point of origin to the consumers.
11:00 a.m.	Adrienne Ivey - Rancher, Blogger, Passionate Agriculture Advocate	AG TALK: Modern Ag	Adrienne is raising the beef on your plate, and she loves talking about it!! She shares farm stories, and bridges the gap between farms and people that are preparing and eating the food farmers grow. Recognizing the moment in time and answering the questions people have about their food.
11:30 a.m.	Curt Borys - Director of Product Marketing, Brandt Group of Companies	PRODUCT LAUNCH: Brandt High-Speed Disc	
12:00 p.m.		Launch Networking	
1:00 p.m.	Karen Proud - President and Chief Executive Officer, Fertilizer Canada	KEY NOTE: Fertilizer: Policies, Politics and Programs	Attendees will have a chance to hear directly from Karen Proud, Fertilizer Canada's President & CEO, the latest issues, programs and trends affecting fertilizer: Canada's most important farm input.
2:00 p.m.	Tim McMillan, former Saskatchewan Party MLA	AG TALK: Is Canadian Agriculture the next target for the international protest movement?	Tim McMillan will talk about international protestors and how they might try to impact the future of agriculture. First they targeted the forestry industry, next they targeted the oil and gas industry, and now they are adjusting their sights on the agriculture industry. The international protestors will push for anti-investment in the industry. As President and CEO of Canadian Association of Petroleum Producers (CAPP) for more than seven years, Tim McMillan was directly experiencing the international protest movement and how it affected the oil and gas sector. Tim will provide some insight on how to be aware of and handle this international protestor movement should it shift to the Agriculture industry.
2:30 p.m.	Patricia Youzwa - Former President & CEO, SaskPower	AG TALK: Investing in Infrastructure to Grow Canada's Agriculture Sector	Patricia Youzwa has been a director of the Canada Infrastructure Bank since its inception in 2017. She is also a director of the Fiduciary Trust Company of Canada, Chair of the Alternative Funds Advisory Committee for TD Asset Management and a national director of the Institute of Corporate Directors. Ms. Youzwa is the former President and CEO of Saskatchewan Power Corporation. She has also held the position of Deputy Minister of Economic Development and Deputy Minister of Energy and Mines for the Government of Saskatchewan. Ms. Youzwa has served on numerous boards and has held policy advisory roles.
3:00 p.m.	Kristjan Hebert - Managing Partner, Hebert Grain	AG TALK: How to run a successful farming operation: Myth vs Facts	Kristjan Hebert has been described as one of the brightest young minds in farming today. He is a grain and oilseed farmer from Moosomin, Saskatchewan. Born and raised on a family farm, he left the farm to get his business degree with a major in accounting & finance, and obtained his CPA with Meyers Norris Penny. In 2008 he returned to the family farm - Hebert Grain Ventures - in partnership with his wife, and his parents. At the farm, Kristjan's passion is solving agriculture's puzzles in order to fulfill HGV's purpose of "Respect the past, Grow the future!" He is also the co-founder of Maverick Ag Consulting which provides custom-designed lending, accounting and insurance solutions to producers.

**LEAD
THE
FIELD.**

ONE-PASS PRODUCTIVITY.

Trouble with your field finish? Fix it with the new Brandt High-Speed Disc and get the best residue management and seedbed preparation in fewer passes.

More Speed

Spend less time in the field with operating speeds of 10 to 14 mph, and our easy-to-use wing down-pressure system.

More Uptime

Purpose-built components with a robotically welded frame and greaseless bearings ensure near-zero maintenance for more uptime and durability.

More Options

Choose from seven unit sizes and a variety of discs and rollers that are perfectly suited to your field, conditions, and desired finish.

Visit us in **Brandt Hall** (Hall #3 of the Co-operators Centre) to see our lineup of hard-working grain handling and tillage equipment.

VIP & INTERNATIONAL BUSINESS CENTRE

With approximately 300 international delegates from 50 countries and our VIP Farmers, the International Business Centre brings Canada together with the rest of the world.

The VIP International Business Centre is a must-see for VIP and International Farmers, equipment dealers and businesses, offering exposure and education on the latest trends and technology in the Canadian agriculture industry. International visitors will be introduced to leading-edge exhibitors that export equipment and technology, which creates a true global marketplace right at the show.

The VIP International Business Centre provides a complete business service package to all VIP and International visitors, including assistance with hotel reservations, shuttle service to the show and airport, private meeting rooms and comprehensive business

services. We also offer business to business meetings between export members and visitors. No matter the company size, these productive meeting sessions offer a place to facilitate contracts, make formal connections and assess potential partnerships with purchasers or suppliers.

The VIP International Business Centre is supported by the collective effort of the Government of Canada and Government of Saskatchewan, along with Saskatchewan Trade and Export Partnership. Through the VIP International Business Centre, outreach program and supporting agencies, Canada's Farm Show is promoted at more than 70 Canadian Consulates and Trade Offices throughout the world.

Visitors will find the VIP International Business Centre on the RHA Mezzanine, Viterra International Trade Centre, second level.

LAUNCH PAD SPEAKERS Presented by AgExpert

DR. BISHNU ACHARYA

Dr. Bishnu Acharya (PhD) has a knack for finding unique solutions to tough problems. Acharya started at USask in September 2020. Acharya's research strategy is to look for ways to create value-added products

and processes with sustainable resources. He works with bioresources to find sustainable solutions with commercial potential, and develops the technology, opening up new business opportunities.

CHIEF CADMUS DELORME, COWESSESS FIRST NATION

Chief Cadmus Delorme, a Cree and Saulteaux, is the Chief of the Cowessess First Nation. In 2019, Chief Delorme was re-elected to a second term in office. Under his

leadership, Cowessess First Nation has focused on economic self-sustainability for its nation and people and has moved forward on renewable energy, agriculture, efficiency in land use initiatives that have created both current and future business opportunities. This past year, Chief Delorme faced one of the hardest moments as Chief when the Saulteaux and Cree First Nation made international headlines with the discovery of potentially 751 unmarked graves near the former Marieval Indian Residential School. Shortly after, Cowessess made headlines again as the first First Nations community to sign an agreement with Ottawa that returns jurisdiction over children in care to the community.

KENRIC EXNER, VITERRA CANADA

Born and raised in Regina, SK, Kenric is an alumni of the University of Regina's Faculty of Business Administration. Employed with Viterra Canada (and heritage companies) since 2005, he focuses on Commodity

Merchandising, Trade Execution and Multimodal Logistics.

SUSAN EWART, EXECUTIVE DIRECTOR FOR THE SASKATCHEWAN TRUCKING ASSOCIATION

Susan Ewart is the Executive Director for the Saskatchewan Trucking Association. As proactive trusted advisors, the STA is a

knowledgeable membership association that represents the collective interests of the truck transport industry through authentic advocacy and education. Susan has had a 30 year+ career in business/entrepreneurship with a background in insurance. In 2015, she was awarded the National Woman of Distinction Award for her contributions to the Insurance Industry.

PARAG GARG, CNH INDUSTRIAL

Parag Garg is the Chief Digital Officer at CNH Industrial. Garg has over 20 years of experience in digital products, technology and strategy, gained in roles of increasing importance across a range of sectors

including consumer products, telecommunications, online retail and technology companies, together with experience in establishing successful digital technology start-ups.

Parag Garg first joined CNH Industrial in his current role in 2021, becoming a member of the Company's Senior Leadership Team. In 2014 Garg joined Sears Holdings, as Vice President and General Manager, Connected Solutions. During his tenure he led the Connected Home and Internet of Things Product and Strategy and established the Sears Seattle Tech Office. In 2013, he was appointed as Executive Technology Advisor to Paul Allen, the American business magnate, investor and philanthropist, responsible for supporting Mr. Allen's personal and professional interests including investments, museums, sports teams and more. Parag Garg holds a Bachelor of Arts degree in Business Management and Entrepreneurship from the University of Minnesota, in the United States. He has registered more than 20 US patents across a range of companies and industries.

BO HALLBORG, MERCHANDISING, VITERRA OILSEED PROCESSING

Bo Hallborg is a merchandiser with Viterra's oilseed processing group in Regina. He has been with the Viterra for 11 years with the last 3 of those in its oilseed processing

group. Bo's primary responsibility is in the sale of conventional canola/soy oils.

KRISTJAN HEBERT

Kristjan Hebert has been described as one of the brightest young minds in farming today. He is a grain and oilseed farmer from Moosomin, Saskatchewan. Born and raised on a family farm, he left the farm to get his

business degree with a major in accounting & finance, and obtained his CPA with Meyers Norris Penny.

In 2008 he returned to the family farm - Hebert Grain Ventures - in partnership with his wife, and his parents. At the farm, Kristjan's passion is solving agriculture's puzzles in order to fulfill HGV's purpose of "Respect the past, Grow the future!" He is also the co-founder of Maverick Ag Consulting which provides custom-designed lending, accounting and insurance solutions to producers.

Hebert Grain Ventures has received the Top Producer Award in January of 2020 as well as being selected as a winner in the Corteva Agriscience 2021 Global Climate Positive Leaders Program. Kristjan is widely respected for his expertise in farm management and is widely thought of as the face of modern farming in Canada.

ADRIENNE IVEY

Adrienne Ivey is passionate about agriculture. She farms and ranches near Ituna, Saskatchewan with her husband, Aaron and her two teenagers Noelle and Cole. They have a mixed farm with cow/calf, feedlot

and a grain farm.

Through speaking events, social media, and her blog,

View From The Ranch Porch, Adrienne shares stories from the farm with people from around the world, and is committed to showing that farmers are everyday people who love the land, their animals, and the food they are growing. Follow Adrienne on Instagram, FaceBook and Twitter to see her take on family, food and farming.

CHERILYN JOLLY-NAGEL

Raised on the Saskatchewan prairies, Cherilyn was elected as the first female President for the Western Canadian Wheat Growers Association, where she challenged government policies that affected the business of agriculture. Cherilyn is a leader on important issues that impact farmers on grain transportation, governance, trade and public trust. As an International Director for the Global Farmer Network, Cherilyn advocates for strong global trade relations and for farmers use of technological advancements. In 2021 she was recognized as one of Canada's TOP 50 People of Influence in Agriculture. In partnership with Utensil.ca, Cherilyn has recently launched a new online training program titled "So... your client is a farmer." This unique and timely training is specifically designed to support individuals who want better business relationships with farmers. Cherilyn Jolly-Nagel and her husband David continue their love for the land while growing grains, pulses, oilseed crops and... two daughters.

JESSE HIRSH, FUTURIST & DIGITAL STRATEGIST

Jesse Hirsh is a futurist speaker and internet strategist. An experienced innovator and collaborator, his passion is educating people on the potential benefits and perils of technology. Jesse helps audiences understand what the future holds for them by sharing strategic, provocative and often humorous forward-thinking insights. He makes the discussion about new technology accessible and empowers groups to embrace the opportunities available to them in this technological age, especially at the forefront of sustainable living.

KEN JACKSON, CEO OF VERIGRAIN SAMPLING INC.

Ken's roots are in agriculture and engineering and he has been an entrepreneur for over 40 years.

His focus has been on developing and commercializing leading edge technologies. He has taken over fifty products from concept through commercialization, many of which have become market leaders.

Ken's latest venture, VeriGrain, solves a major problem in the food chain, which will result in grain utilization and value being maximized, easier traceability, and ultimately more and better food getting from the field to the table.

BOB MAZER, PRESIDENT AND CEO, MAZERGROUP

In 1959 Bob's Father, Ed Mazer Sr., moved to Brandon and purchased Brandon Implements, a Massey Ferguson dealership. Bob started working at the dealership at a very young age and at one point worked both on his family farm

and at the dealership. In 1975 Bob Mazer and his brother Ed purchased the business from their father. Today, Mazer-group is a privately owned group of machinery dealerships offering agricultural, construction and commercial turf equipment sales, parts and service. Mazergroup has expanded to 18 locations across Manitoba and Southern Saskatchewan. Bob is a true leader in agriculture and is dedicated to helping the industry expand. His partnership with technical colleges, business councils, fair boards and agricultural organizations have ensured that our industry remains at the forefront of technological advances and economic policies.

TIM MCMILLAN

Tim grew up on a family farm near Lloydminster, where the McMillan family first homesteaded more than a century ago. He founded and operated an oilfield services company. His solid understanding of the oil and gas industry from both a business and landowner perspective, coupled with his background in economics, propelled his desire to seek a seat within the Saskatchewan Legislature. In 2007, Tim was elected as a Saskatchewan Party MLA in the riding of Lloydminster. Tim held several strategic cabinet portfolios in the Government of Saskatchewan, including Minister of Energy and Resources and Minister Responsible for Trade. He was appointed President and CEO of the Canadian Association of Petroleum Producers (CAPP) in 2014 and served in that role for nearly 8 years.

CHRIS MORSON, RAVEN SALES SPECIALIST

Chris joined the Raven Precision Ag sales team in 2020, with a direct focus on OMNiPOWER and has since expanded his knowledge in all other Raven agriculture solutions. Chris concentrates his sales efforts on core products to expand market share in Western Canada with a special focus on driving awareness for OMNiPOWER by sharing the Raven Path to Autonomy. Chris has an extensive 15+ year background in agriculture, with comprehensive experience around seeding, tillage and planting, precision ag solutions, and the full suite of ag data and logistics. What drives Chris's passion in autonomous agriculture is the rewarding opportunity to share the journey to innovation by helping farmers realize, adopt, and utilize the latest farming technology to improve efficiencies and optimize their operations to become more profitable, doing more with less!

KAREN PROUD, PRESIDENT & CEO, FERTILIZER CANADA

Karen Proud joined Fertilizer Canada in April 2021, after more than two decades of senior management roles in both the public and private sectors. After graduating with a Bachelor's of Applied Science from Ryerson University in 1997, Karen began a nine-year career with Health Canada taking on increasingly senior-level roles in the areas of policy and legislative affairs. In 2006, Karen left the public service to pursue opportunities in the private sector. Her most recent roles, prior to joining Fertilizer Canada, were

that of: Chief Operating Officer for Food, Health and Consumer Products Canada, President of Consumer Health Products Canada and Vice President of Federal Government Affairs for the Retail Council of Canada. Karen is a past board member of the World Self-Medication Industry Association, Labour Watch, as well as the Canadian Partnership for Consumer Food Safety Education.

BRYAN PRYSTUPA, SENIOR PRODUCT OWNER, FCC AGEXPERT

Bryan Prystupa is a Senior Product Owner with the FCC AgExpert team. He works closely with partners and companies across Canada to develop integrations that will

help producers utilize their digitized farm data. He has a passion for helping advance Canadian agriculture and food through technology.

Bryan joined FCC in 2013 with roles in lending, strategic marketing and software development. Growing up on the other end of the agri-food value chain, Bryan spent a lot of time working at his parents' food wholesale and distribution company based out of Regina, Saskatchewan.

DAVID PRZEDNOWEK, ASSISTANT VICE PRESIDENT, GRAIN, CN

David leads the marketing activities for all carload movement of grain and processed grain products across the CN network, including carload pricing, car allocation, and

commercial car supply products. His sales responsibilities at CN cover most US-based agricultural accounts, focused on grain merchandising along with corn, soybean, corn, and barley processing. David is based out of Winnipeg and grew up on a livestock and grain farm near Beausejour, MB. He has been involved in and around the grain business his entire career and has been with CN since the fall 2014.

KYLE SCOTT, MANAGING DIRECTOR AT CONEXUS VENTURE CAPITAL

Kyle is a Managing Director at Conexus Venture Capital where he's responsible for the firm's investment strategy, managing two funds - a 2019 vintage general tech fund and

Emmertech a \$60-million dollar Agtech focused fund. Prior to joining Conexus Venture Capital, Kyle was a Vice President with Clairvest Group Inc., where he led the firm's agriculture investment strategy. Kyle was also an Engagement Manager with McKinsey & Company where he led projects in private equity due diligence, and strategy and operations serving clients around the world.

KEVIN STEWART

Kevin Stewart is a sought-after and award-winning speaker on issues related to leadership and media influence. His unique perspective has grown from his years as an Olympic television producer, media entrepreneur and a farmer. As host and producer of the AGVI-

SION television series, which aired across Canada and the US for thirteen years, Kevin's kids remind him that he is not famous! Kevin insists however that he is frequently mistaken for people who are famous! Kevin focuses on important issues such as Fake News and Real Problems: How the 24/7

News Cycle Impacts Our Mental Health.

DR. MEHMET TULBEK, PRESIDENT, SASKATCHEWAN FOOD INDUSTRY DEVELOPMENT CENTRE

Dr. Mehmet Tulbek is the President of Saskatchewan Food Industry Development Centre. Mehmet has been a research,

technology, and innovation leader with over 20 years of pulses, cereals, oilseeds and plant-based foods' global research and development, technical services, business development, international technical education, and management experience.

Mehmet served as the Director of Research and Development at AGT Food and Ingredients in Saskatoon, Canada, and worked at Northern Crops Institute (NCI) as Crop Quality Specialist and then as Technical Director. He currently serves as Adjunct Professor at the University Of Saskatchewan Department Of Food and Bioproduct Sciences and the University of Manitoba Department of Food and Human Nutritional Sciences.

VIKRAM VIJ, CHEF

Vikram Vij was born in India in 1964 and lived in New Delhi and Bombay until the age of 20, when he went to study, live and work in Austria. Vikram moved to Canada in 1989 to work at the Banff Springs Hotel in

Alberta. In September 1994, Vikram opened Vij's Restaurant in Vancouver, BC. In early 1995, a passionate and a creative Meeru Dhalwala joined him, and the two began collaborating on the menu. In 2004, Vikram and Meeru opened a second restaurant and market called Vij's Rangoli. In June 2014, Vikram opened his third restaurant, My Shanti, based in South Surrey. The theme of My Shanti is based upon Vikram's culinary travels, and includes flavours, ingredients and influences from all over the world. Vikram Vij is a tireless advocate of Indian cuisine in Canada, and of buying and eating locally produced and sustainable ingredients.

PATRICIA YOUZWA, DIRECTOR OF THE CANADA INFRASTRUCTURE BANK

Patricia Youzwa has been a director of the Canada Infrastructure Bank since its inception in 2017. She is also a director of the Fiduciary Trust Company of Canada, Chair

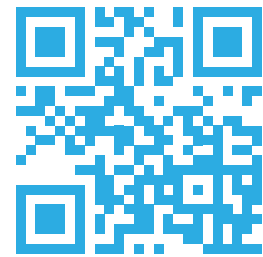

of the Alternative Funds Advisory Committee for TD Asset Management and a national director of the Institute of Corporate Directors.

Ms. Youzwa is the former President and CEO of Saskatchewan Power Corporation. She has also held the position of Deputy Minister of Economic Development and Deputy Minister of Energy and Mines for the Government of Saskatchewan.

Presented by FCC

**SHAKIRAT EDOHO,
FOUNDER OF ATARE FOODS**

Shakirat Edoho is a CPA by trade, and the Founder of 9jafoodie Blog, Loselt Nigerian Nutrition and Atare Foods. Atare Foods' mission is to provide nutritiously dense products that are rooted in traditional processes. Shakirat is focused on developing a Nigerian stew base as a nutrition source inspired by the traditional Nigerian diet. She is an expert regarding Nigerian recipes for wellbeing and health, and has over 325,000 followers on Instagram. Shakirat is based in Regina.

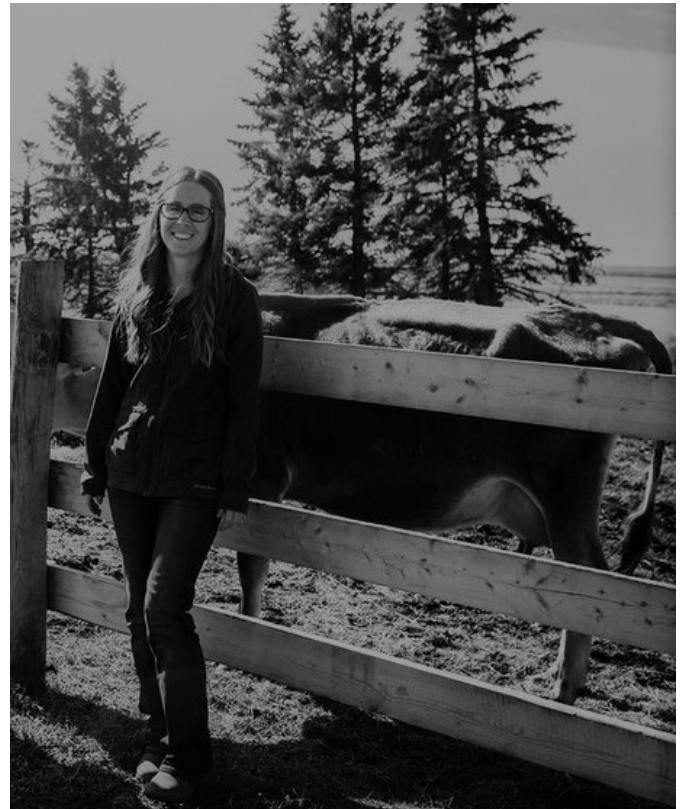

**LINDSAY BEAULIEU,
FOUNDER OF ILOVEMICROGREENS**

Lindsay founded iloveMicrogreens, an organic and urban farm company in 2019 and developed a passion for growing healthy and sustainable food. Fast forward to 2021 and her urban farm is sprouting greens all year to provide delicious salads for their local community. Packed with nutrients, the fresh produce and salads are sold out on a daily basis. Lindsay is constantly innovating and looking for ways to ensure produce access all year round. Lindsay is based out of Red Deer, Alberta.

**ERIN KERNALEGUEN,
FOUNDER OF LIVING SKY FARMS**

Erin is a North Saskatchewan dreamer and farmer. She co-founded Living Sky Farms with her business partner, Sarah. Living Sky Farms provides a variety of grains that can purchased milled or whole to mill at home, as well as soup and bread mixes. Both Erin and Sarah recognize the taste difference and nutritional value that comes with fresh, whole grains, and believe in the positive impact that local whole foods can have on the health of our community and soils. Erin is based near the RM of Birch Hills, Saskatchewan.

Saskatchewan's Outstanding Young Farmers' Program is designed to recognize young farmers in the province who exemplify excellence in their profession. During Canada's Farm Show, our winner will be announced and will be joining other national finalists from across Canada to compete for Canada's Outstanding Young Farmer event.

Canada's Outstanding Young Farmers for 2022 will be chosen at the national event in Saskatoon, Saskatchewan from November 23 – 27, 2022.

2022 OUTSTANDING YOUNG FARMERS NOMINEES

GARRET AND JOCELYN POLETZ
P CROSS RANCH LTD., BIGGAR, SK

Garret and Jocelyn Poletz own and operate P Cross Ranch Ltd located near Biggar Saskatchewan. In the last ten years they have built a diverse cattle operation which includes a 3000 head backgrounding feedlot, 500 head cow-calf program and a salt and mineral business. They rely heavily on corn production which gives them the ability to feed large amounts of cattle on minimal acres. They operate over 7000 acres with 3500 acres being owned land. They have three daughters Haylee 7, Hannah 5 and Houstyn 3.

Both Garret and Jocelyn believe it's critical to be involved in the industry through networking and organizations. Garret is currently on the Saskatchewan Cattle Feeders Association board and is the group's representative to the Saskatchewan Cattlemen's Association. He credits a big part of their success to the relationships they have made in the industry. They are always looking to try new ideas and are constantly "thinking outside of the box". Jocelyn is currently an agriculture and commercial lender and since obtaining her Bachelor of Commerce degree from the University of Saskatchewan in 2009 has spent her entire career working full time in the agriculture sector. They are both extremely passionate about the industry and strive to help others succeed by sharing their extensive experience and knowledge.

**CODY STRAZA AND ALLISON SQUIRES
UPLAND ORGANICS LTD.**

Cody and Allison own and operate a mixed cattle and certified organic grain farm near Wood Mountain, Saskatchewan along with their three boys, Declan, Gavin and Caden. Cody grew up on a farm in the Wood Mountain area and completed an Engineering degree at the University of Saskatchewan. Allison was born in Newfoundland and met Cody while completing her PhD in Toxicology at the University of Saskatchewan. A few years after getting married they realized their goal of owning their own farm in 2010 when they bought their first land together and started Upland Organics.

Being involved with several organizations on the local, provincial, national, and international levels has allowed Cody and Allison to actively give back to their community as well as meet other innovative and successful farmers. Learning from others and through their own on-farm experimentation they have successfully adopted farming techniques that include reduced tillage, intercropping, cover cropping, pollinator strips, and rotational grazing. Using these practices, they have shown it is possible to improve their soil and be excellent stewards of the environment while also realizing financial benefits.

Through their innovation and outreach, Cody and Allison have become leaders in organic agriculture. They have received several awards for their efforts and look forward to continuing to give back to the agriculture sector in Canada. Their ultimate goal is to pass on a thriving operation to the next generation of farmers. To do this they are focused on doing more with less while identifying opportunities to expand their market with value added and diverse enterprises. They see many opportunities within the agriculture industry and are excited about what the future holds for the next generation of farmers.

**ASHLEY AND LEE EASTMOND
WHEATLAND CATTLE COMPANY, MORTLACH, SK**

Wheatland Cattle Company, operated by Lee and Ashley Eastmond, is located in Mortlach, Saskatchewan. Over the years the operation has changed from being strictly cow/calf, to backgrounding and in 2017 to taking their calves out to finish. They also offer custom feeding, silaging and bale hauling. On the operation they are always challenging themselves to become better, think outside the box and ignite changes within the operation. Developing the feedlot and taking their calves to finish has catalyzed their operation to where it is today.

In 2020, they recognized that consumers had a desire for quality, locally-produced beef, and were growing more comfortable with online shopping and direct delivery so they pulled up chairs around the kitchen

table and began formulating a plan.

Following considerable research and strategizing, they launched "Kattle Kountry Beef" with Lee's parents and haven't looked back. In August 2021 they purchased a local butcher shop and rebranded as Butcher Block on the Prairie. This acquisition made their operation fully vertically integrated.

The philosophy of "from our family farm to your fork" is the very essence Kattle Kountry Beef. Every roast, steak and package of ground beef can be traced back to the animal's birth on the farm. They are VBP+ (Verified Beef Production) Certified, upholding the highest standards in animal health, welfare, environmental respect, and sustainability.

Our next generation of decision makers, consumers and big thinkers is sitting in classrooms across Saskatchewan.

Help us reach them to build a stronger agriculture future.

WORK SAFE AROUND POWER LINES

Last year, there were 288 farm-related power line incidents in Saskatchewan. And sadly, this included one young farmer who died from his injuries.

When you're out in the field, always use a spotter. Plan your routes ahead of time. And if you contact a power line, stay in your vehicle. Call SaskPower at 310-2220 or 911 in an emergency.

Visit saskpower.com/lookupandlive to learn more.
Come see us and our High Voltage Demonstration at the Farm Show.

Canada's Leader in Agriculture Equipment Manufacturing

Let us help you understand how Saskatchewan's competitive taxes, incentives and productive workforce can drive your growth.

- Increase yield and acreage during seeding and harvesting
- Saves wear and tear on seeding and harvesting equipment
- Soil salinity is decreased and saline soils are rejuvenated
- Grasshopper and mole infestation around potholes and sloughs can be reduced
- Water basins formed during flash rains can be pumped to prevent drowning of plants

WATER CANNONS

Pump your slough dry in record breaking time.
Move up to 2000 GPM covering 4-6 acres.

WATER CANNONS

Designed by the people that use them.

FEATURING

- High Pressure Irrigation Pump • Hydraulic Priming Pump
- Hydraulic Side Boom • High Flotation Tires
- Pressure Relief Safety Valve on Priming System

WE'RE EVERYTHING YOU TOW!

DOUBLE A TRAILERS

Premium grade steel trailers manufactured in Alberta.

*Focused on customer needs.
Designed for the harsh Northern climate.*

- Best in industry coating system
- Urethane paint & primer, bed lined front
- Engineered beam & neck goosenecks
- Arctic wiring rated to -60 deg Celsius

*More than 30 models available to choose from.
Choose from 9 custom colors. Quality Build, Quality People.*

Two Hills, Alberta

HAVE YOUR SAY!

The Government of Canada is consulting on its approach to pesticide regulation in Canada. Stand up for science-based regulation.

Now is the time to make your voice heard and let the government know that the agriculture industry needs a science-based regulatory system that supports innovation to contribute to global food security, drive greater sustainability and compete on the world stage.

THE NOTORIOUS CHALLENGE OF HIRING HOURLY & SEASONAL STAFF

By Bonnie Johnson, AgCareers.com

As any farmer knows, there's a gap between agricultural operations' needs for hourly and seasonal employees and the candidates willing or able to take on this type of role. This difficulty has plagued the industry for years, and only intensified in 2021.

But to look on the bright side, if you're experiencing recruitment difficulties, especially for hourly/non-exempt staff, you're not alone. Competition for talent remains the top human resource challenge reported in the **2021-2022 AgCareers.com Canadian Agribusiness HR Review**.

Recruiting hourly staff is notoriously difficult. AgCareers.com's survey of agricultural operations illustrates that this challenge intensified over the past year. Agriculture and farm employers noted hourly staff as one of the most difficult levels and types of roles to recruit for (2021-2022 Canadian Agribusiness HR Review).

Agricultural operations deployed various strategies to meet staffing needs throughout the year. Flexibility in schedule and employment of part-time staff were the top two strategies to meet staffing needs. Over 20% of organizations employed temporary staff and more than 20% employed contractors.

Nearly 30% of agricultural employers hired temporary/contract staff for 3 to 9 months, with this number expected to stay the same over the next year. One-third of operations employed skilled seasonal staff, typically from 3 to 6 months of the year.

How are employers hiring hourly employees? First is reaching prospective applicants with employee referral programs, followed by online job boards, like AgCareers.com. The top strategy to compete against other Canadian employers is a positive work culture. Providing employees with the opportunity to use their skills and abilities was the top method to maintain or improve company culture.

As many agricultural production operations gear up for the season, AgCareers.com is offering a \$150 job posting special for seasonal or temporary employees through August 1, 2022. Employers can use code SEASONAL2022 on **AgCareers.com** to receive the discounted price.

Are you hiring seasonal or temporary employees to fill gaps in your workforce?

Use code **SEASONAL2022** to receive a single job posting for **\$150**

AGcareers.com

The *Agribusiness HR Review* provides a range of human resource practices relevant to participating agribusinesses over the last 12 months. The annual *Agribusiness HR Review* survey, conducted by AgCareers.com, highlights various strategies used in both large and small ag businesses, across a variety of agricultural sectors, to win talent. Download a free copy of the full 2021-2022 AgCareers.com Canadian Agribusiness HR Review report at agcareers.com/reports.cfm

ACHIEVE ONE-PASS PRODUCTIVITY WITH BRANDT

Introducing the Brandt High-Speed Disc

Brandt Agricultural Products is excited to announce that their new High-Speed Disc will be unveiled on the Canada's Farm Show Launch Pad on Thursday, June 23 at 11:30 am! This is the newest addition to their growing lineup of premium tillage equipment built here in Saskatchewan.

The new high-speed disc allows farmers to manage crop residue, condition seedbeds, level ruts, and reclaim wetlands rapidly with operational speeds of 10 to 14 mph. Brandt's high-speed disc is the heavyweight of the industry with an average weight of nearly one thousand pounds per foot, and their active wing-down pressure system delivers uniform weight distribution to eliminate an uneven tillage floor when operating at high speeds.

The unit is purpose-built to maximize farmers' uptime with minimal maintenance requirements. It features induction-hardened chrome plate pins, composite bushings with nylon wipers, sealed disc hubs, and has

just six easily accessed grease points to simplify maintenance.

A unique set of performance enhancements on the new unit includes a rear finishing suspension, hydraulically controlled roller scrapers, transport height adjustment, and lateral gang adjustment. Plus, Brandt delivers a range of disc and finishing roller options that allow farmers to customize their ideal field finish – every time. There are three disc styles available, including u-notched, smooth, and fluted discs that cut and size residue appropriately, and the choice of rubber rollers, cage rollers, and spring rollers to suit field conditions.

And, with seven working widths ranging from sixteen to forty-five feet, including narrow transport models, there is a High-Speed Disc for every farm.

Accelerating Canadian Agtech

Technology is driving global agriculture forward. The future relies on collaboration, innovation, and the ability to leverage our strengths and become leaders who drive a sustainable future here at home, across the country, and around the world. Who better to lead the growth of agtech in Canada and beyond than Saskatchewan.

Cultivator powered by Conexus (Cultivator) and Emmertech, a new agtech focused venture capital fund managed by Conexus Venture Capital, are excited to be a part of the 2022 Canada's Farm Show, showcasing the next wave of agriculture innovation in Canada.

Mark your calendars + watch the action in person!

TUESDAY, JUNE 21

Pitch Finale | 2:45 PM - Launch Pad Stage

This event brings together the best and brightest in agriculture, technology, and business to pitch ideas, form teams, and build a minimum viable product (MVP) in just 24 hours! Join us as we watch the 24 Hour Startup | Agtech teams pitch their MVPs to a panel of guest judges for a chance to win up to \$7,000.

WEDNESDAY, JUNE 22

Investor Panel | 2:00 PM - Launch Pad Stage

Venture Capital and investment into the agriculture industry is rapidly growing. Hear from some of North America's top investors about why they are excited to be investing into the next wave of agtech companies.

**AGTECH
ACCELERATOR**

Demo Day | 2:45 PM - Launch Pad Stage

Cultivator, Emmertech and Economic Development Regina have partnered together to accelerate the growth of agtech through an Agtech Accelerator program. The inaugural cohort (11 companies from Canada and 5 companies from the United Kingdom) will pitch their innovations in hopes of securing a deal with investors in the audience.

Attend the 24 Hour Startup Finale, the Investor Panel, and Agtech Accelerator Demo Day for a chance to win **\$1,000.00 prize package!** The winner will be drawn at the end of Demo Day on **Wednesday, June 22!**

FARM STRESS LINE & RURAL SUPPORT

Whether you live on the farm or in a rural Saskatchewan community as a youth, adult, family, or senior, you can call toll free and talk to one of our Crisis Counsellors.

People living in rural Saskatchewan experience the same stresses and worries as everyone else. These may include financial worries, difficulties at work or at home, domestic violence, relationship problems and issues around sexuality. Youth may experience bullying, racism, relationship stressors and abuse. However, rural Saskatchewan also faces barriers that are primarily associated with rural living. These may include little or no access to services, lack of public transport, isolation and loneliness.

Crisis Counsellors will help you assess and identify alternatives to address your immediate problems.

Global Institute for Food Security

Finding solutions to the challenges facing the global food system requires an approach that moves at the speed of business.

Founded in 2012 in a partnership between Nutrien, the Government of Saskatchewan and the University of Saskatchewan (USask), the Global Institute for Food Security (GIFS) works with a diverse range of partners to discover, develop and deliver innovative solutions for the production of globally sustainable food.

Located within one of the world's strongest agri-science ecosystems, GIFS is helping to build a food-secure world from Saskatchewan-out, working with industry, producers, researchers, governments and consumers to decrease the time between the discovery of innovative science and its delivery to market at home and around the globe.

DAVID

BEAUDOIN

Meet Canadian Cheese Ambassador, David Beaudoin at Canada's Farm Show

David Beaudoin answers to many names including Squeaky Cheese Guy, Cheese Poet, and of course, Canadian Cheese Ambassador.

"An emotional connection is made when people enjoy and savour local food. I love educating people of the pleasures of eating amazing Canadian cheeses and supporting the industry. Cheese is not the enemy! Cheese is our friend! Our yummy, healthy, delicious friend. I invite you to explore some different cheesy experiences. They're all fun, exciting, educational, and engaging for everyone!"

2022 PRESIDENT'S RECEPTION

June 20

Join Canadian Cheese Ambassador, David Beaudoin as he showcases amazing Canadian Cheese.

BEER AND CHEESE SEMINAR

June 21

Cheese isn't exclusive to wine pairing only - it also goes great with beer. Come learn and enjoy!

EMPOWERING WOMEN

June 22

Be "Holy Cow Wowed" at this fun and educational wine and cheese seminar following the conference.

NEW TECHNOLOGY
ACCUSET2™ SYSTEM

Name of Inventor: **Bourgault Industries Ltd.**
 Name of Manufacturer: **Bourgault Industries Ltd.**
T: 306-275-2300 | www.bourgault.com
E: marketing@bourgault.com

The hydraulic frame adjust 3335QDA PHD™ is available with the ground-breaking AccuSet™ on-the-go seed depth adjustment option. To adapt to the ever-changing moisture conditions, AccuSet™ allows you to adjust your seeding depth accurately, from the seat of the tractor, and reach the moisture with ease. Smart hydraulic cylinders are connected to an ECU that you control, via Bluetooth, through an AccuSet™ app installed on your smartphone. The simple and intuitive screen makes operation easy.

To adapt to the ever-changing moisture conditions to help ensure even emergence resulting in maximized field productivity. The AccuSet2™ System allows you to adjust your seeding depth accurately, from the seat of the tractor, and reach moisture with ease.

NEW EQUIPMENT
BETTER MADE 4 WHEEL STEER TRACTOR

Name of Inventor: **Better Made Italy**
 Name of Manufacturer: **Better Made Italy**
T: 306-545-7236 | www.bmtractors.com
E: parkdaleholdings@sasktel.net

Better Made 4 Wheel Steer Tractor is more than a tractor. This "Tool Carrier" is exceptional in its characteristics, it's not just a tractor. For mowing any where that you're inclined.

NEW EQUIPMENT INNOVATION
CAMERA ARM

Name of Inventor: **Roland Wohlgemuth**
 Name of Manufacturer: **Michel's Industries**
T: 306-366-2184 | www.michels.ca
E: bradm@michels.ca

Camera attached to an arm which automatically lifts up when the roll tarp is opened on a grain trailer for viewing loading grain. The arm will also keep its position if struck by low doors or auger spouts. The arm then folds down under the tarp when the tarp is closed. Allows customers to monitor loading grain without climbing and rushing up and down the grain trailer to view filling. Much safer and less likely to spill grain.

NEW SERVICE
CLHBID.COM

Name of Inventor: **Roy Carter**
 Name of Manufacturer: **CLHbid.com**
T: 866-263-7480 | www.clhbid.com
E: corry@clhbid.com

CLHbid.com provides a unique, leading edge online sales platform to market and sell Agricultural Land in Western Canada. In Agriculture, for any job you need the right piece of equipment and the right operator. At CLHbid.com we are just that - the right platform with the right team of professionals to advise on all matters to ensure you receive top value from the sale of your Agricultural Land.

CLHbid.com was designed by Roy Carter, Q.C. to eliminate the shortcomings associated with decades old methods of selling Agricultural Land. As a lawyer and farmer in rural Alberta, Roy often witnessed the difficulties and the stress farmers encountered when the time came to sell their land. Farmers know better than anyone the importance of using the right tool for a specific job, yet when the time came to sell, there was no tool tailored just for agricultural land. CLHbid.com is a function of trying to address the shortcomings with traditional formats, whether selling at the kitchen table, sale by auction, tender in the newspaper, or listing with conventional real estate.

BMTRACTORS.COM

GRASSLANDS
BROKERAGE & CONSULTING

GRASSLANDS BROKERAGE & CONSULTING IS A FAMILY-OWNED AND OPERATED BROKERAGE BASED IN SASKATCHEWAN. BRINGING PRAIRIE FARMERS AND BUYERS INTO DIRECT RELATIONSHIPS, THEY WORK CLOSELY WITH BOTH PARTIES TO MANAGE CONTRACTS AND HELP GROW SUCCESSFUL RELATIONSHIPS.

NEW EQUIPMENT SERVICE
COMBO-RATE BOOM END FLUSH VALVE FOR RECIRCULATING BOOMS

Name of Inventor: **Wilger Industries Ltd.**

Name of Manufacturer: **Wilger Industries Ltd.**

T: 306-242-4121 | www.wilger.net | E: info@wilger.net

The Combo-Rate boom end flush valve (CRBEFV) will set the next generation of sprayer booms, in both function and boom hygiene. The valve easily incorporates the easiest recirculating sprayer boom plumbing possible. The flanged fitting can be attached to any boom pipe, removing any threads from a sprayer boom (risk of failure). The Combo-Rate ports on both sides of the valve provide a nozzle body or turret to be placed at the furthest most part of the spray boom, allow zero deadspace for chemical residue to build and accumulate. The boom end flush valve provides a full drain flush valve directly below the last nozzle body at the furthest-most part of the boom, ensuring the end of the sprayer boom cannot develop any chemical buildup. The nozzle body position also passive purges all air that is caught in the sprayer boom that can cause nozzle run-on. Every aspect of the flush valve is designed to maximize function, safety & hygiene, and provide a platform for the best sprayer booms for the next decade and beyond.

Key Features:

- Improve environmental safety & sprayer hygiene (Recirculating sprayer booms, less chemical dripping or run-on, less cross contamination between chemicals)
- Improve Operator safety and improve function. (Fully contained flush valve, full boom drain & rinse, common flanged fitting so it is compatible with common plumbing fittings regardless of sprayer)
- Improved Productivity (recirculating sprayer functions, no threaded fittings that are prone to failure over time, better rinsing, easier flushing, easy nozzle selection with turret)
- Most Compact Sprayer valve on the market - With many sprayers today, the sprayer boom frame is very tight, resulting in many products to retro-fit to a recirculating sprayer boom would simply not fit or work. The CRBEFV fits flush to the last nozzle body turret, using no wasted space on the boom at all.

NEW TECHNOLOGY
COMBYNE

Name of Inventor: **Alain Goubau**

Name of Manufacturer: **Combyne Ag**

T: 613-223-6110 | www.combyne.ag

E: c.nesbitt@combyne.ag

Combyne Ag is a digital crop marketing hub built for grain farmers.

Independently integrating across the different crop marketing programs and grain buyers a farmer works with, Combyne manages all of a farmer's marketing records in mobile-friendly App, informing decisions across every bushel of grain they market.

When it comes to selling their crop, farmers lack the data, insight, and tools they need to make optimal decisions. When deciding to sell, a farmer needs to consider an overwhelming number of variables. This includes data unique to a farmer's individual farm (e.g. cost of production, available storage, available inventory) as well as micro- and macro- market conditions (e.g. futures prices, local bids, freight costs). In an ideal scenario, a farmer would make decisions that would lead to optimal returns to their farm (e.g. maximize gross margin) and minimal risk of losses (e.g. overcommitting, selling below cost).

NEW TECHNOLOGY
CROP INTELLIGENCE

Name of Inventor: **South Country Equipment**

Name of Manufacturer: **South Country Equipment**

T: 306-721-5050 | www.southcountry.ca

E: ism@southcountry.ca

Crop Intelligence is a software application developed in Regina, Saskatchewan that brings agronomic insights to in-field soil moisture and environmental sensor data. Soil moisture and rainfall are important determinants of yield potential in field crops such as wheat and canola. Crop Intelligence utilizes site-specific weather station and soil moisture information throughout the growing season to track Water Driven Yield Potential and support the data-driven decisions of farmers and their agronomists. Up to this point, Crop Intelligence has focused primarily on dryland farming. However, irrigation farmers are interested in utilizing the software, even though it has not been optimized for their needs or marketed to them.

NEW TECHNOLOGY INNOVATION

FINDOOR

Name of Inventor: **Findoor Industrial Inc.**
 Name of Manufacturer: **Findoor Industrial Inc.**
T: 403-680-5667 | www.findoor.ca
E: kirk.odooley@findoor.ca

Supply folding doors to help better seal large openings in the agriculture world. Our doors have no cables, springs or drums, seal to the face of the structure and have very little wearable products.

NEW EQUIPMENT INNOVATION

FULL-FLOOR HOPPER BIN AERATION SYSTEM

Name of Inventor: **Francisco Zacharias**
 Name of Manufacturer: **NorBin**
T: 204-384-7850 | www.norbin.ca
E: Frank@norbin.ca

Our new patent-pending, Full-Floor Hopper Aeration system is an ingenious design that is revolutionizing hopper bottom-bins. Our hopper bottom grain bin aeration system is like no other because we offer a “full floor” aeration system where the entire hopper is aerated.

Our design will aerate the whole hopper cone to eliminate wet pockets in your grain bin. This system includes a second, perforated floor inside the hopper cone. The air is then equally distributed between the hopper cone and pushed through the perforated floor. As a result, grain bins do not need to be filled to the top for our aeration system to work. Your grain will always receive even airflow.

NEW TECHNOLOGY

OMNIPOWER 3200

Name of Inventor: **Raven Industries**
 Name of Manufacturer: **Raven Industries**
T: 605-336-2750 | www.ravenprecision.com
E: rachel.hennen@ravenind.com

OMNiPOWER™ 3200 is the next evolution of our autonomous power platform. It features mechanistic, functional, and aesthetic upgrades. The new Tier 5 engine has increased horsepower and the machine's hydraulics system has been optimized, adding 50% more power to the ground to improve operating speeds. The 3200 model features improvements to serviceability, making it easier for customers to work on the machine in the field.

Features include:

- Remote command, supervision, and monitoring in the field or another cab
- Completes spreading and spraying tasks autonomously
- Multi-directional moving, multi-purpose machine that delivers effortless implement changeover
- Short- and long-range sensors detect obstacles for safe operation
- Can be run in autonomous mode in fields or by handheld remote control in yards or equipment sheds.
- “Labour shortage concerns within our local growers have really elevated the need for more automation and robotics on the farm.” - Chuck Baresich, President of Haggerty AgRobotics.

NEW TECHNOLOGY

Q-REVEAL

Name of Inventor: **Quantum Genetix**
 Name of Manufacturer: **Quantum Genetix**
T: 306-956-2071 | www.quantumgenetix.com/q-reveal
E: dna@quantumgenetix.com

Q-Reveal takes a new approach to feedlot technology. Combining individual genetic variability with proprietary algorithms to identify and account for pen performance. Allowing feedlot producers to maximize feeding margins and prioritize shipments for increased profitability.

Q-Reveal fills a niche hole in the cattle feedlot industry that has been overlooked - when and how to market cattle. Traditionally industry has used live cattle weight as a precursor and evaluation of when a beef animal is ready for harvest. Q-Reveal uses both genomic information and scientific data to track the growth of the beef carcass allowing for an unbiased, accurate and precise decision making on when cattle need to be shipped.

This innovation allows for larger feedlots over 10,000 head to maximize every dollar in margin per pen, considering feeding cost and current market prices. As well as enabling smaller feedlots under 5,000 head to harness the knowledge and tools to make decisions that traditionally have not been available to them.

NEW TECHNOLOGY
RCFARMARM

Name of Inventor: **Vince Pawluski**
 Name of Manufacturer: **Pawlutions Ltd.**
T: 780-837-4462 | www.rcfarmarm.ca
E: rcfarmarm@gmail.com

RCFarmArm overlays your armrest controls, and ignition key in minutes, no wiring just secure both modules and plug in to tractor's accessory power port. Giving you the safe control of your tractor where ever you need to be standing while performing stationary PTO tasks. Control engine starting and stopping, engage/disengage PTO, 2 Hydraulic functions on/off and 4 users' customizable functions. PTO engage and engine start have a safety interlock, therefore they require 2 buttons to be pressed together to perform their functions. Farmers are able to safely stop all functions and shut the tractor down in seconds with the e-stop on the remote. There is also a second e-stop located on the electrical box inside the tractor. We have an additional add on steering modular for bagger and extractor use. RcFarmArm has an internal battery to allow shut down of all controls in case of a 12v power interruption. There are 5 indicator lights (located in the tractor so it can be viewed from all sides) to visually alert of what functions are being used.

The purpose of the innovation was to bring safety to the operator of stationary PTO equipment. To have the safety and convince of having all the tractor controls in their hand. RCFarmArm allows the farmer to be standing where they need to be when operating stationary PTO equipment, providing a safer option than climbing up and down the tractor stairs and running back and forth to the tractor. Thus keeping the operator away from the PTO shaft, where the OEM's have placed their solution. This is the first product that has been available to the end user.

NEW TECHNOLOGY
RECON SPRAYSENSE

Name of Inventor: **Intelligent Agriculture Solutions**
 Name of Manufacturer: **Intelligent Agriculture Solutions**
T: 701-356-9222 | www.intelligentag.com
E: marketing@intelligentag.com

Recon SpraySense™ is a retrofittable spray quality monitoring solution for commercial sprayers that monitors the flow and pressure at every nozzle tip and provides that information to the operator via an iPad application. The Recon SpraySense™ system tracks on-target application and coverage of the spray

operation by incorporating machine speed, and nozzle selection, into the per-nozzle pressure and flow performance. This insight ensures each aspect of the operation is well understood and enables the farmer to know if they are applying correctly. Recon SpraySense™ is a closed system that works across a plethora of machine types, including self-propelled and pull behind. The only interface requirements are a power source, the correct nozzle body interface, and an iPad. The system provides all necessary components for installation.

Operators do not know how each nozzle is performing on their sprayer. All the value of these advanced machines is centered around the performance of the spray tip. Knowing this performance, the operator has critical insight into their machine, and can take several actions to improve their on-target performance. Reducing travel speed, making adjustments to the system pressure, replacing failing nozzle tips and catching blockages are just a few of the many actions the operator can take.

NEW EQUIPMENT INNOVATION
RETRACTING TRANSFER AUGER FOR AIR SEEDER

Name of Inventor: **Darren Grose**
 Name of Manufacturer: **Rodono Industries**
T: 403-784-3864 | www.xtend-auger.com
www.rodono.ca | E: dgrose@rodono.ca

This is an add on kit to fit existing air seeders with a retracting transfer auger. To make it easier to unload hopper bottom trailers into an air seeder cart.

XTEND-AUGER.COM

NEW EQUIPMENT INNOVATION

SABRE CLAMP

Name of Inventor: **Brian Cruson**

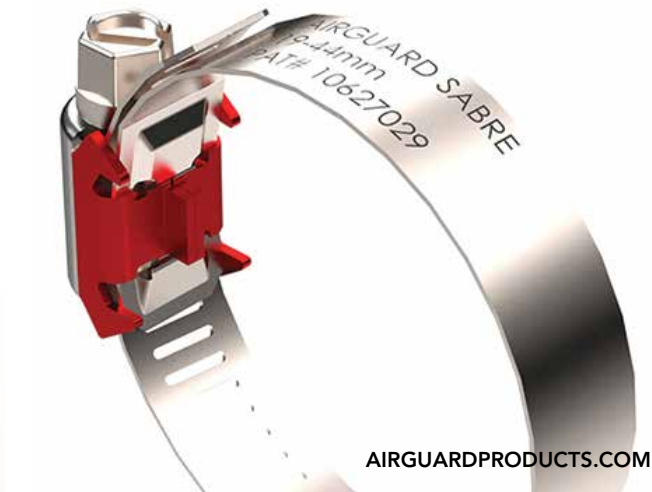

Name of Manufacturer: **Airguard Incorporated**

T: **604-787-5409** | www.airguardproducts.com

E: bcruson@airguardproducts.com

The Airguard (TM) Sabre Clamp is the ultimate clamping system to ensure that your air seeder hoses stay where they should be. Our patented technology uses teeth to bite into the hose for 2x more clamping power.

Keep Hoses Locked in Place - Patented clamp with integrated teeth grips hose 2x more than standard hose clamps. Prevent Misses in your field - Nothing is worse than seeing strips in your field where a hose came off. Airguard™ Sabre™ Clamps will keep your hoses where they should be. Peace of mind - Know that you don't have to keep checking to make sure all your hoses are attached.

NEW TECHNOLOGY

SOILEOS BIOACTIVE CROP NUTRIENTS

Name of Inventor: **Jason McNamee, Farah Nour, Peter Gross & Michael Riedijk**

Name of Manufacturer: **Lucent Bio**

T: **778-676-4155** | www.lucentbio.com

E: bryan@lucentbio.com

Soileos is a suite of bioactive crop nutrition products that enhances yields, increases crop quality, improves soil health, and amplifies nutrient density. Lucent BioSciences' patented process upcycles agriculture and food processing cellulose-rich co-products such as: lentil, pea, wheat and oat hulls into a sustainable delivery agent for nutrients. Soileos has a consistent particle size, and is smooth, hard, and easy to distribute for precise application. Each granule of Soileos is

packed with nutrients, and is free of unwanted contaminants.

Lucent Bio has solved the challenge of nutrient delivery in agriculture with a new class of fertilizers we've branded "Soileos". Lucent's core technology is a composition of matter patent that describes the process of binding all major classes of micronutrients in bio-available form to cellulose fibers without the nutrients tying up or leaching into the environment. In addition, all of Lucent's products are integrated with bioavailable sulfur and potassium. Lucent has branded this new product "Soileos". Due to its unique chemical properties, the nutrients remain bio-available throughout the growth cycle of the crops. This bio-availability is the result of the micronutrients contained in Soileos being released only under biological demand from crops and the soil microbiome.

NEW EQUIPMENT INNOVATION

T-BIN

Name of Inventor: **Pat Beaujot, David Kosior, Trevor Phenix**

Name of Manufacturer: **AgMinded Research & Development**

T: **306-735-7783** | E: pat.beaujot@sasktel.net

This is a large scale 10,000 bu. portable grain bin. It is designed to help with the harvest surge capacity. Much like grain bags are used. It goes into telescope down to transport meeting highway height limits and once on site it telescopes up to be a large hopper bin. The hopper base has receivers for transport wheels. All lifting and lowering is done with hydraulic motors. To give farmers an alternative to grain bags. It also provides farmers with a better resale value for large scale grain storage.

NEW EQUIPMENT INNOVATION

TERRAFORMER

Name of Inventor: **Mike Hrabarchuk & Darin Hubscher**

Name of Manufacturer: **Ag Shield**

T: **204.281.4440** | www.agshield.com

E: mikeh@agshield.com | darinh@agshield.com

The TerraFormer is a pull behind Earth Mover that can go from a v wing shape to a pull-dozer shape using one large hydraulic cylinder. This allows a farmer to have the benefits of two machines in one. In transport position, the TerraFormer is under 12' and it has a low centre of gravity giving it the safest design for road transport.

NEW EQUIPMENT TECHNOLOGY
THE NORM TRUCK SAFETY FILL SPOUT

Name of Inventor: **John Gehrer**

Name of Manufacturer: **Never Spill Spout.com**

T: 204-371-7839 | www.neverspillspout.com

E: johngehrer@yahoo.ca

The "NORM" truck safety fill spout attaches to the truck-loading auger. Once the grain on the truck reaches the spout, an audio alarm is activated. This lets the truck driver know to move the truck forward. By repeatedly moving the truck, when alarm sounds the whole truck can be filled without getting out of the cab or climbing up on the trailer.

NEW EQUIPMENT INNOVATION
THUNDERDRYER & AIR MISSILE

Name of Inventor: **Greg O'Hare**

Name of Manufacturer: **Go Technologies Ltd.**

T: 204-362-3668 | www.thunderstruckag.com

E: jeremy@thunderstrucksales.com

The ThunderDryer gives you the opportunity to condition and dry your grain in your bin allowing you to take your grain off the field in better conditions and operate your harvest in less than favourable conditions. The Dryer works on positive pressure and will not shut down with static pressure. Flu gasses are vented off before they enter the bin, meaning water vapour is not a concern. You are able to dry your grain in the bin with no monitoring required. The ThunderDryer features an efficient heat exchange system that isolates combustion gases and exhaust and eliminates heat source contact with valuable inventory.

The Air Missile was designed to solve the problem of moisture caps forming at the top of bins using in-bin aeration to dry grain. It consists of an 8" vertical tube that directs air to the upper portion of the bin where the moisture cap usually forms. This redirected air flow continues to push the moisture up and out, drying the grain faster and more evenly throughout the bin.

Get even drying from top to bottom and eliminate the need to turn your grain with complete drying in one bin. The Air Missile is a cost effective method of reducing carbon dioxide emissions, maintaining grain quality, and increasing the storage life of your grain.

The purpose of the ThunderDryer and Air Missile is to recreate the perfect day on the field and save the farmer time and money. The set work together to dry grain faster and without the need to turn their grain or monitor the operation, thus allowing the farmer more time for other jobs on the farm.

NEW TECHNOLOGY
TRIMAX™ TRIPLE-SHOOT SYSTEM

Name of Inventor: **Bourgault Industries Ltd.**

Name of Manufacturer: **Bourgault Industries Ltd.**

T: 306-275-2300 | www.bourgault.com

E: marketing@bourgault.com

UNRIVALED SEED SAFETY.

The new TriMax™ Triple-Shoot System provides unrivaled seed safety by delivering true independent product separation in one pass. A dedicated seed line is directed to the center of the seed row, starter fertilizer is placed in a side-band, and nitrogen is directed to the Mid Row Bander® Fertilizer Applicators. By incorporating a small separation between seed and starter fertilizer and N through the MRBs®, Producers can apply rates required for a maximum yield without endangering their seed.

The TriMax™ Triple-Shoot System significantly reduces seed mortality allowing producers to confidently lower seeding rates, yet still achieve the same target plant stand.

NEW EQUIPMENT
TRIPLE GREEN PRODUCTS BIODRYAIR

Name of Inventor: **Triple Green Products**

Name of Manufacturer: **Triple Green Products**

T: 204-746-6333 | www.triplegreenproducts.com

E: braden@triplegreenproducts.com

The Triple Green Products BioDryAir is a grain drying system that is fueled by biomass instead of fossil fuels, it

Powering farms of
today with solutions
built for tomorrow

is the first commercially available unit of its kind.

The purpose of the Triple Green Products BioDryAir is to allow grain farmers, custom dryers, and elevators to be able to use biomass to fuel their grain dryers rather than fossil fuels. This creates an operational cost savings in that the biomass burns dryer than fossil fuels resulting in reduced amounts needed to dry the grain and is not subject to carbon tax resulting in further reduced costs. Another one of the purposes of the the BioDryAir is to offer an environmentally conscious method of drying grain.

NEW EQUIPMENT

ULTRA SR

Name of Inventor: **Norbert Beaujot**
 Name of Manufacturer: **SeedMaster Manufacturing Ltd.**
T: 306-721-3001 | www.seedmaster.ca
E: ashley@seedmaster.ca

At 60 feet wide with 750 bushels of total capacity, the Ultra SR increases maneuverability and contours to the land to ensure precise seed and fertilizer placement.

SeedMaster has raised the bar again by introducing an entirely new model of seeding system with the Ultra SR - an exceedingly precise and nimble single rank seeding system equipped with our patented, industry-leading UltraPro II metering and opener technologies. Because of this unique design, this seeding system offers unsurpassed agility, residue clearance, product handling, and crop emergence.

VALE GRAIN GIANT FIELD BIN

Name of Inventor: **Vale Industries**
 Name of Manufacturer: **Vale Industries**
T: 306-695-2460 | www.valeindustries.ca
E: kendra.cruson@valeindustries.ca

The Vale Grain Giant™ is the evolution of decades of experience combined with a vision to drive efficiency at harvest time. The Grain Giant™ was designed for the producer who is looking to increase productivity on their farm. Built to withstand the harshest environments with heavy-duty materials and ingenious design, the mobile grain bin Grain Giant™ has been field-proven in Australia and is now successfully in use for harvest 2020 in North America.

Purpose of this machine is to maximize harvest efficiency and increase safety on the farm.

VALEINDUSTRIES.CA

NEW TECHNOLOGY

VERIGRAIN SAMPLE ACQUISITION AND INFORMATION MANAGEMENT SYSTEM

Name of Inventor: **Ken Jackson**
 Name of Manufacturer: **VeriGrain Sampling Inc.**
T: 306-717-6414 | www.verigrain.com
E: kjackson@verigrain.com

VeriGrain™ is an inventory intelligence system which allows producers to track grain quality and quantity as it is sampled while being loaded in and out of storage. A digital record is created using the VeriGrain™ app to which grain characteristics can easily be added and shared. Grain samples are stored in bar coded containers and tamper-evident bags for easy management and traceability.

VeriGrain™ helps ensure samples are representative, so analysis is accurate. It allows producers to analyze stored grain inventory to plan a marketing strategy to get maximum prices. Information can be digitally shared with buyers, who have confidence in the analysis.

CLEANFARMS' TAMMY SHIELDS WINS PRESTIGIOUS WASTE MINIMIZATION AWARD FOR GROUND-BREAKING WORK IN GRAIN BAG RECYCLING

www.cleanfarms.ca

MOOSE JAW, SK — Cleanfarms' Western Region Program Coordinator, Tammy Shields, has been recognized as a pioneer in agricultural recycling for her ground-breaking work establishing grain bag recycling in Saskatchewan.

The Saskatchewan Waste Reduction Council (SWRC) presented its 2022 prestigious Waste Minimization Award to Ms. Shields on April 28 at its annual Waste ReForum conference. The award honours an individual who has made an extraordinary contribution to waste reduction in the province.

"When we looked at how agricultural plastics recycling has evolved in this province, Tammy Shields was a key driver. Everyone who is involved in recycling grain bags in Saskatchewan has benefited from her dedication," said SWRC Executive Director Joanne Fedyk.

A native of Saskatchewan, Shields lives in Moose Jaw. Her education as an agrologist and her career path put her in fields with farmers, in municipal council chambers with elected representatives, at landfill sites with attendants and in board rooms with corporate executives. If the discussion involved agricultural sustainability, Shields took on the task and was equally comfortable in all those settings. Well known for her environmentally-focused work among her peers, Shields also served as a director of the SWRC and worked with the Moose Jaw River Watershed Stewards.

Under Tammy's leadership, the Moose Jaw River Watershed Stewards was the first watershed group to tackle household hazardous waste as well as agricultural plastics. That early effort resulted in the recycling of more than 450 tonnes of grain bag plastic.

"Tammy committed a lot of time to learning about all aspects of the agricultural plastics industry and is always willing to share her knowledge and learn from others to balance the producers concerns and protecting the environment. I do believe that she was one of the pioneers for where we are today in keeping ag plastics out of landfills or being disposed of on farm. Tammy so rightly deserves to be recognized for her contribution to the plastic recycling program in Saskatchewan," said John Kindrachuk, executive director of the Redberry Lake Biosphere Region.

Shields is widely considered to be the "go-to" expert on grain bag recycling and it was that reputation that led Cleanfarms to invite her to join the team in 2017 as the stewardship organization was developing a product stewardship program plan for the grain bag industry

under the province's new regulation.

"Tammy kick-started grain bag recycling in Saskatchewan and is the driving force behind the province's strong track record for responsible management of these items. It didn't matter if farmers used three grain bags or three hundred, Tammy had time to work with everyone," said Cleanfarms Executive Director Barry Friesen. "Her passion for agriculture combined with her dedication to promoting sustainability made her an ideal recipient for this award. We are very proud of her."

Today, Shields not only oversees 45 grain bag recycling collection sites in Saskatchewan, she is also helping to organize grain bag and other ag plastic recycling in Alberta and Manitoba.

Cleanfarms is an agricultural industry stewardship organization that contributes to a healthier environment and a sustainable future by recovering and recycling agricultural and related industry plastics, packaging and products. It is funded by its members in the crop protection, seed, fertilizer, animal health medication and grain bag industries. It has staff located in Lethbridge, Alberta; Moose Jaw, Saskatchewan; Winnipeg, Manitoba; Etobicoke, Ontario; and St-Bruno, Quebec.

The Saskatchewan Waste Reduction Council (SWRC) presented its 2022 prestigious Waste Minimization Award to Tammy Shields of Moose Jaw on April 28 at its annual Waste ReForum conference in Regina. With Ms. Shields is Henry Mutafya, Environmental Specialist at SaskTel which sponsored the SWRC awards program. The award honours an individual who has made an extraordinary contribution to waste reduction in the province. Ms. Shields was recognized as a pioneer in agricultural recycling for her ground-breaking work over the past 12 years helping to establish grain bag recycling in Saskatchewan. Ms. Shields is the Western Region Program Coordinator for Cleanfarms, a national agricultural industry stewardship organization that develops and implements recycling programs for agricultural plastics, packaging and products. – Cleanfarms photo

PRECISION AGRICULTURE THAT MEETS ENVIRONMENTAL, SOCIAL, AND CORPORATE GOVERNANCE

There are many reasons to adopt precision agriculture, such as reducing waste, reducing costs, increasing profits, and reducing farming’s footprint on the environment.

For today’s young people who will be tomorrow’s leaders, considering environmental, social, and governance factors in addition to financial factors related to the agriculture industry are all equally important.

Farms.com is pleased to announce that for the second time, students studying agriculture can apply for a scholarship to win **one of three US\$2,000 scholarships**. Students who have a precision agriculture idea that will have a positive impact on the environment, or are socially responsible, are encouraged to apply for the scholarship.

SCHOLARSHIP VALUE

The equivalent of US\$2000 / country.

DEADLINE FOR STUDENT VIDEO SUBMISSION

11:59 pm, Thursday, June 30, 2022
(Eastern Time, North America).

JUDGING

A panel of judges, composed of sponsors, industry leaders, and Farms.com staff members, will determine the top submissions in each country, and post these on Farms.com.

The top submissions will be shared in late August, and farmers and producers will be invited to vote on the best thesis/ideas throughout August and September.

STUDENT SCHOLARSHIP PANEL PRESENTATION

The winners, as determined by voting in each country, will be asked to participate in a Precision Agriculture Student Panel Webinar, where they will have the opportunity to present their thesis idea in more detail to farmers.

ELIGIBILITY

Students can be studying in any field, not just agriculture, including robotics, AI, engineering, environmental science, etc. However, the ideas will need to be practical and appealing to farmers, as farmers will be voting on

the concepts they believe are the most worthy and practical for farmers in North America and the United Kingdom.

- Contest is open to students in the United States, Canada, and United Kingdom.
- Enrolled full-time in a college or university program either as an undergraduate or as a graduate student
- Enter contest between October 20, 2021, and Thursday, June 30, 2022 at midnight.
- Winners will be required to provide proof that you are enrolled in and attending the course of studies as outlined in your submission.

SUBMISSION PROCESS

Students are invited to submit their idea, via a social media video (Twitter and Facebook). The video should describe the student’s research/thesis or new idea regarding precision agriculture and its potential positive impact on the environment or is socially responsible.

- Videos should be less than 2-minutes in length
- Include the student or students first name(s)
- Include the hashtag **#PAG22scholarship**
- Entries should also tag the following social media accounts:
 - **Twitter:** @FarmsNews, @OntAg, @FarmsPrairies
 - **Facebook:** @Farmscom

For privacy reasons, video submissions should not include student’s full name, email, or telephone number in the submission. Once Farms.com has received the contest entry, we will direct message students to obtain your full name, email address, street address, and telephone number.

To learn more about becoming a scholarship sponsor in the United States, Canada, or the United Kingdom please contact PrecisionAg@Farms.com.

The winners of the 2021 Farms.com Precision Agriculture Scholarship Contest each won a scholarship valued at US \$2,000. The winners were:

- United States Winner: Austin Brown, Animal Science Student, Penn State University
- United Kingdom Winner: Will Smith, PhD Student, Agriculture Science, University of Lincoln
- Canadian Winner: Nicholas Bannon, BA Food, Agriculture and Resource Economics Student, University of Guelph
