**BearClaw**

**EASYVEY**

**Hay Handler**

### THE LATEST IN BALE SHREDDING

The all-new BearClaw Bale Processor is a bale shredder and blower unlike other bale processors. One of the BearClaw's most note-worthy features is it's absence of knives. No more sharpening knives when you should be in your barn bedding your cows. The BearClaw utilizes a nifty hook and screen setup to provide a long lasting shredding system.

**BearClaw**  
SINCE 1982

### Hay Handler

You already know how weather-dependent making premium hay can be. It's the Hay Handler's job to work on your side, making the most of the haying windows the weather permits you. With it, you can merge invert, fluff or windrow your cut swaths.

But what sets the Hay Handler apart is the ease with which it handles hay pickup. With it, you can pick up a 10' wide swath of hay that has been laid out by your discbine and reduce it's drying time. With the hay handler, you can mow in the morning and do haylage in the evening.

**DON'T BE DISAPPOINTED... PRE-ORDER YOUR CONVEYOR EARLY!**

**Box Blade**

**Straight Blade**

**Minimum Road  
Transfer Width**

**Reverse Box  
Blade**

The SnowWing's design allows you to handily change from a traditional box blade to a straight blade, with the added bonus of extra clearing width. But it doesn't stop there: the endplates are hydraulically-controlled and equipped with industry-proven rotary actuators, giving you rugged and limitless control within the massive 180 degree rotation. This means you can use your blade on an angle with one end open and the other parallel to the direction you are driving. This allows you to get closer to buildings and parking stones with less chance of damage and better clearing results. With the endplates in their full open position, the blade can be used as a reverse box blade allowing you to back drag snow for full clearing even in the tightest of spaces.

# MTZ Big Tractors No Computers No DEF

The MTZ Factory, located in Minsk, Belarus, is one of world's largest tractor manufacturers, serving Canadian farmers since 1968. The factory produces heavy, rugged and reliable tractors, with no computers, no complicated electronics, no DEF. Over 70% of service calls on new tractors sold today are related to sensors, emissions, computer error codes and electronics. Dealers are constantly paying for upgrading their repair equipment, and those costs are passed to farmers as higher service bills. MTZ tractors, with up to 5 yrs power train warranty, offer simple, reliable mechanical design that can be maintained with most basic tools. Therefore they are much more economical to own and operate for many years.

It's not vertical tillage. But it's not traditional, either. The new generation HORSCH Joker RT can't be marginalized to a label, because it's "agronomically correct." Based on solid farming principles, it's designed as a do-it-all tillage, chemical incorporation and seedbed prep tool. Aggressively size the toughest residue, accurately incorporate chemicals, and smooth a seedbed at a scorching 8-12 mph. No matter the type of operation, the Joker is the "correct" choice.

## Excellence in small bale packaging systems

Our STRENGTH is in our KNOTS. The Bale Baron uses high strength plastic twine and a double knot system to tightly bundle its packs. The most efficient binding option available, twine is strong, cost effective and easy to cut with a pocket knife. Tying this twine is the Raspe low maintenance knotter system. Increasing your productivity, our knotter system only requires one greasing per year. This means less time servicing and more time in the field.

# "I HELP FARMERS GET FARM LOANS"

My name is Elizabeth Gnoinski, Mortgage Agent. My parents owned a dairy farm in Ontario. My brothers and sisters all helped out with the farm. My dad got sick, the bank refused to give us time to sort out our finances, and we lost our farm through no fault of our own. I will never forget that!

I grew up and had a hobby farm. It was a tough go with brutal cold and snowy winters and a short growing season.

## I UNDERSTAND THE CHALLENGES YOU FACE!

I became a licenced mortgage agent with **Expert Mortgage** so that I could help farmers across Ontario.

I specialize in **AGRICULTURAL LENDING**. With over 400 private lenders to back me combined with my farming background, **I work hard for you!**

Rates from **2.10%**  
As of September 2016 OAC  
— Based on 5 year term  
**35 years**  
Amortization on non-working farms

**Even if you have BAD CREDIT & NO PROOF OF INCOME, I can still help you. I do RESIDENTIAL, COMMERCIAL & CONSTRUCTION LOANS too!**

## I REPRESENT OVER 400 LENDERS

Many provide 1st, 2nd and 3rd mortgages **even** with:

- Horrible Credit
- Bankruptcy
- Unemployed
- Mortgage Arrears
- Property Tax Arrears
- Power of Sale
- Self-Employed
- Pension & Disability

# Landini

**THE 4 SERIES** is the very latest addition to the Landini tractor family. Designed to replace several heritage series tractor lines with a single, more versatile range, the 4 Series fully revolutionizes Landini's low- & medium-power segment.

**SIX MODELS** ranging from 64 to 107 hp, and are powered by Deutz 4-cylinder engines that meet the EPA's strict Tier 4i emissions requirements.

[www.landini.ca](http://www.landini.ca)

#### 12X12 SHUTTLE AND POWERSHIFT

The 4 Series tractors feature a versatile, modular 12x12 transmission with four synchronized gears in three ranges.

#### DELUXE CAB

Designed to offer best-in-class operator comfort, the cab of the 4 Series tractors has an automotive-style interior with ergonomically arranged controls providing a safe and stress-free working environment for long hours in the field.

#### HIGH PERFORMANCE HYDRAULICS

Featuring two gear-type pumps, one feeding the steering system and the other operating all hydraulic functions, the hydraulic system in the 4 Series has the braun to handle heavy demands.

## 10 TIPS TO HELP FARMERS BE PREPARED FOR TAX SEASON

*By Diego Flammini Assistant Editor, North American Content Farms.com*

As the old adage goes, “the taxman cometh.” And like everyone else, farmers want to get the largest return possible.

Here are 10 tips to help you maximize your chances of having a stress-free tax procedure.

1. Keep good records – Keep all records up to date because disorganized books can be a reason to get audited.
2. Always file a tax return and file on time
3. Time capital gains and losses to reduce your overall tax burden – If farmers earn a capital gain early in the tax year, they can choose to recognize capital losses near the end of the year to offset the gains.
4. Plan borrowing to avoid losing tax deductions – Separating loans between personal and business can help tax preparers and CRA identify tax deduction opportunities.
5. Make mortgage interest tax deductible – Farmers could consider refinancing and investing the equity into their business.
6. Know your capital gain reserve benefits for property to a child – The reserve can be claimed up to a maximum of nine year, which spreads out the capital gain over 10 years. The maximum reserve is calculated as a percentage of the capital gain and can be claimed each year.
7. Use spousal RRSP to split income – Moving reportable income to the spouse in a lower tax bracket can help ensure less tax is paid on the same income upon retirement.
8. Plan RRSP contributions – Tax deductions of RRSPs may be better used in years when you can anticipate a higher net income, whereas TFSAs could be an option for years with lower incomes.
9. Invest in a TFSA – Earned interest or capital appreciation is not included as income.
10. Have a risk management plan – Farm risk management plans at the provincial and federal levels can help farmers protect their farm income and investments from unforeseen market circumstances.
